Dry Air Solutions

Steam Humidifiers

Trusted Solutions for a Healthy Home™

HOUSEHOLD PROBLEM:

*Dry indoor air is **more** than just an inconvenience. It's a threat to the health and comfort of your family —as well as your budget.*

For more information about the health, comfort and structural problems caused by dry indoor air, visit [aprilaire.com](https://www.aprilaire.com)

Is the dryness of your home's air under control?

Dry air can be a problem in almost any home, but it is most common in semi-arid climates and those that require forced-air heating during the cooler months of the year.

In fact, during the winter months, the combination of cool, outdoor air and forced furnace heat can cause your home to be drier than the Sahara Desert. If you experience dry air in your home, it's more than just a nuisance.

Air that's not properly humidified can have serious implications:

- + Low relative humidity can make you more susceptible to catching a cold.* And flu viruses have been linked to speedier progression and transmission in dry air.**
- + The respiratory infections caused by cold and flu viruses are a leading trigger of asthma in children.† Plus, cold, dry air on its own can aggravate asthma.
- + Static shock and dry, itchy skin, eyes and throat can all be traced back to air that's not properly humidified.

But that's not all. Dry air can cause structural damage to your home and possessions, the result of which can be quite costly. It can cause walls, woodwork and hardwood floors to crack. And those annoying static shocks? They can cause irreparable damage to your electronic equipment.

Then, there's the impact that dry air can have on your energy bill. Dry air can actually make you feel colder at normal temperatures, causing you to overheat your home.

According to the Environmental Protection Agency, for every degree you heat your house, you add four percent to your energy bill.‡

Dry indoor air is more than just an inconvenience. It's a threat to the health and comfort of your family—as well as your budget. Thankfully, with Aprilaire®, there's something you can do to control it.

Healthier, comfortable air is within reach with Aprilaire.

While dry air can make your home both uncomfortable and unhealthy, there's no need for you and your family to suffer. Aprilaire whole-home steam humidifiers can help. They are installed as part of your home's heating and cooling system and automatically deliver the perfect amount of humidified air, not just to one room, but throughout every room of your home.

Your dealer will recommend the ideal model and placement for your home.

An Aprilaire Whole-Home Steam Humidifier Can Help You

⊕ CONTROL HEALTH

Maintaining the right humidity level throughout your home not only helps keep your nasal passages and airways healthy, it helps reduce colds and the flu. Even the common cold can be controlled with proper humidity. According to Dr. Joseph Lubart in an article in the New York State Journal of Medicine, "The most important prevention measure would appear to be proper regulation of the humidity, especially during the heating season with its distressing drying of the indoor air and the creation of an environment favorable to the cold bug." Aprilaire humidifiers monitor indoor relative humidity (RH) to make sure the air in your home is unwelcoming to viruses and other unhealthy inhabitants.

⊕ PROTECT YOUR HOME

You've invested a lot into your home's features and contents. An Aprilaire humidifier can help keep your possessions protected. Furniture, hardwood floors, musical instruments and electronics are all safer when your home is properly humidified.

⊕ INCREASE COMFORT AND ENERGY EFFICIENCY

Optimal humidity can also help you stay warmer at cooler temperatures. That means you can lower your thermostat and save energy, thereby lowering your heating costs.

Learn more about the benefits of whole-home humidification [aprilaire.com](https://www.aprilaire.com)

Aprilaire—delivering improved comfort to your home and family.

Aprilaire is the indoor air quality leader in whole-home humidification solutions. In 1953, we introduced the very first effective whole-home residential humidification system.

Since then, Aprilaire humidifiers have been often imitated, but never duplicated. Our revolutionary technology and innovative solutions continue to set the standard for precision whole-home humidification.

Performance and Peace of Mind

Our humidification solutions are engineered and manufactured in the United States. Once installed by your local heating and cooling specialist, they require little maintenance or attention.

*The leader in
healthy home solutions
since 1953.*

Perfectly humidified air is within your control.

Aprilaire whole-home humidifiers come with many distinct advantages. One is that they are installed as part of your heating and cooling system.

That means they deliver perfect humidification throughout your entire home without multiple noisy, unsightly and difficult-to-maintain portable units.

Another advantage is that Aprilaire whole-home humidifiers deliver the perfect amount of humidity, 24 hours a day, seven days a week. They accurately measure the outdoor temperature and indoor humidity levels to provide the ideal amount of indoor relative humidity.

Automatic Digital Control mounted on a heating system

Automatic Digital Control

The Aprilaire Automatic Digital Control mounts on your heating system and features Auto-Trac® to automatically deliver the optimal amount of humidity, regardless of conditions. It features a convenient display and indicators to let you know relative humidity levels, operation status and any service needs. For a more precise humidity control and preservation, we suggest the wall-mounted digital display humidistat.

Aprilaire offers a full line of WiFi and wired thermostats for convenient, efficient control of temperature, humidity and all indoor air quality accessories.

WiFi Control of Indoor Air Quality

Aprilaire WiFi Thermostats with IAQ Control provide the most convenient and accurate control of humidity and temperature. The thermostat works with the Auto-Trac® feature to automatically deliver optimal humidity. Automatic Humidity Control is integrated into the thermostat, and with the app, you can easily control temperature and humidity levels from anywhere with your mobile device. The app also allows you to control other installed Aprilaire IAQ products for optimal fresh air ventilation and air purity and keeps you up-to-date about changing climate conditions in your home.

A humidification solution for every home.

Your Aprilaire dealer will recommend which one is right for you.

| Aprilaire Humidifiers | Model No. | Type of Humidification | Unit Size Width x Height x Depth | Plenum Opening | Capacity GPD = Gallons Per Day | Electrical Data |
|---|---|---|--|----------------|--------------------------------------|------------------------|
|  | 800^{††} 801^{***} | Steam Humidifier For applications when evaporative units are less practical (attics, crawl spaces, closets, milder winter climates, non-forced-air heating source). | 10 ¹ / ₈ " x 20 ⁷ / ₈ " x 7 ¹ / ₈ " | - | 11.5 GPD | 120V-60 Hz 11.5 AMP |
| | | | | | 16.0 GPD | 120V-60 Hz 16 AMP |
|  | 865 866^{***} | 800^{††} 801^{***} | Fan Pack: 14" x 6 ⁹ / ₁₀ " x 3 ¹⁵ / ₁₆ " Finished Grille: 16 ¹³ / ₁₆ " x 9" x 1 ¹⁵ / ₁₆ " | - | 20.5 GPD | 208V-60 Hz 11.5 AMP |
| | | | | | 30.0 GPD | 208V-60 Hz 16 AMP |
| | | | | | 23.3 GPD | 240V-60 Hz 11.5 AMP |
| | | | | | 34.6 GPD | 240V-60 Hz 16 AMP |

HUMIDIFIER SIZING GUIDELINES GPD Needed Per Square Foot Based on Building Structure Tightness

| Structure Tightness (8' Ceilings) | 1000 Ft ² | 1500 Ft ² | 2000 Ft ² | 2500 Ft ² | 3000 Ft ² | 4000 Ft ² | 5000 Ft ² |
|--------------------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| Tight | 4.3 GPD | 6.4 GPD | 8.5 GPD | 10.6 GPD | 12.7 GPD | 17 GPD | 21.2 GPD |
| Average | 8.6 GPD | 12.8 GPD | 17 GPD | 21.3 GPD | 25.4 GPD | 34 GPD | 42.6 GPD |
| Loose | 12.7 GPD | 19.1 GPD | 25.5 GPD | 31.8 GPD | 38.1 GPD | 51 GPD | 63.6 GPD |

*****801 & 866 Modulating Steam Humidifier** - For precise RH control. Controls are sold separately.

††Model 800LC available for low conductive water 75-300uS/cm and 120VAC applications.

†AHRI Air Conditioning, Heating, and Refrigeration Institute GPD = Gallons Per Day Guideline F A family of 4 will add 2 gallons of humidity

per day through everyday activities like breathing, cooking, bathing and washing. Evaporative capacities assume blower is active 100% of the time, plenum temperature is at 120°F and water is cold.

Water Usage Rate - Model 800 is 0.6 to 1.8 gph (gph=gallons per hour) depending on voltage, amp draw and water quality.
